

## The Pepite platform

Pepite, the Technological Innovation Platform for Businesses, aims to drive the development of breakthrough technologies by placing micro and nanotechnology within the reach of small- to medium-sized businesses.

**Pepite: the crucial second step** in our proven incubation process

- Explore the potential of micro and nanotechnologies
- Leverage the innovation capacity of a world-caliber center for technological innovation
- Design your next-generation products
- Transform your ideas into viable innovations

### Step 2 PEPITE

#### Step 1 IDEAS & USES

##### EXPLORATION

#### INTEGRATION short-term projects

#### Step 3 R&D

##### R&D

Research contracts, joint labs, and collaborative projects

New resources to get your **ideas to market quickly**

#### + Unparalleled technological know-how

- A palette of proven, robust technologies coupled with world-caliber science and engineering skills, all from the French Atomic and Alternative Energy Commission (CEA)
- Practical advice for selecting winning technology based on feasibility studies and proof-of-concept tests

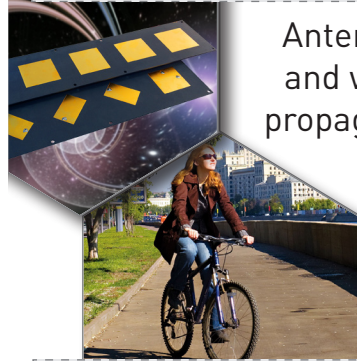

#### + Responsiveness

- The project management and engineering support you need, right away, thanks to our dedicated staff

#### + Assistance getting your innovation to market

- An active support network of high-tech businesses and institutions across the region
- Advice on project financing
- Help developing a business case and outlining a roadmap for industrial-scale production

# Cutting-edge Leti technology for your applications

Antennae and wave propagation

Wireless communications

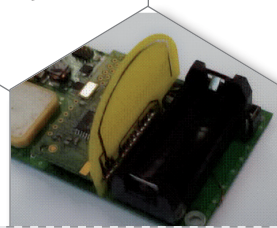

Indoor & outdoor location systems

Energy harvesting and management

Sensors and sensor networks

## Applications:

- Transportation
- Retail
- Sports & recreation
- Infrastructure
- Process control & safety
- Healthcare
- The environment

## Our solutions

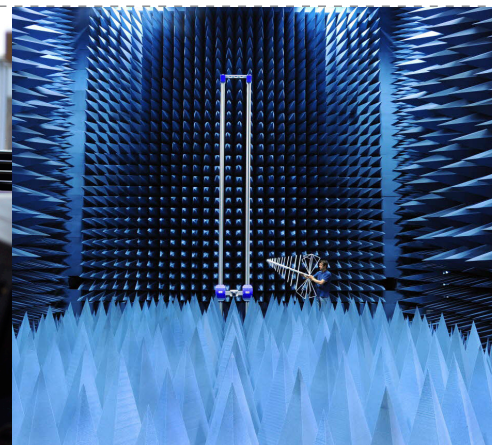

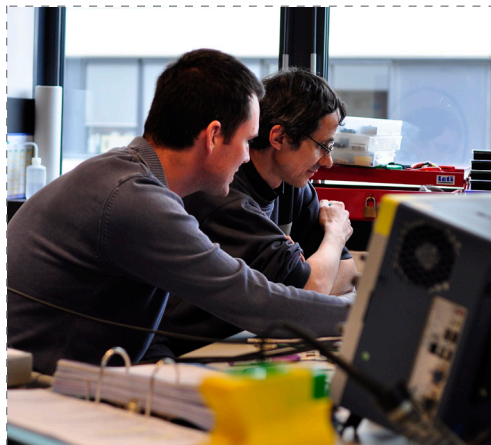

**+** Project engineering

**+** Shared resources

**+** Secure workspaces

*Our short-term contracts (6-12 months) don't require any major R&D spending.*

*You get personalized service from an innovation manager assigned to your project, as well as from CEA experts and project implementation engineers and student engineers.*

Set the next standard **innovate**
